

# **Master's Program in Disaster Risk Reduction and Resilience, National Taiwan University**

NTU is the most prestigious university in Taiwan and is among the top 100 universities in the world. Guided by independent thought and a pioneering spirit of enterprise, students at NTU become a part of the nation's most prosperous center of learning and receive a comprehensive, quality education. On the disaster prevention level, NTU reinforces collaboration with governments, enterprises, and private sectors and offers students on-site experience and education. With several disaster research centers on campus and numerous connections with industry experts, the **MDR3 program** is built on abundant resources and a firm educational foundation.

The **MS Program in Disaster Risk Reduction and Resilience (MDR3)** is designed to equip students with expertise in resilience, risk assessment and management, climate change adaptation, and contingency planning. These skills are in increasingly high demand in government agencies, the private sector, NGOs, academia, disaster reduction industries, and from local to international authorities.

The well-rounded [curriculum](#) is organized into two directions: **Resilience and Environmental Planning** and **Disaster Prevention and Mitigation Technology**. It offers theory- and research-based teaching as well as application-based training. This program aims to cultivate industry leaders and scholars with a holistic vision to invest in sustainability efforts.

## **Admission Requirements:**

- ✓ Bachelor's degree from a regionally accredited college or university
- ✓ English proficiency certificate at CEFR B2 or above

## **2nd Round Application Period**

Dec 16, 2024 to Feb 13, 2025

## **Details about the Program**
