

# International Ph.D. Program in Cell Therapy and Regenerative Medicine

## 2025 Fall International Students Admission - Call for Applications!

Exciting news for aspiring students! Taipei Medical University is now accepting applications for the 2025 Fall International Students Admission for the **International Ph.D. Program in Cell Therapy and Regenerative Medicine (IPCTRM)**.

### About the program

To meet the growing medical needs of aging populations worldwide, researchers are actively seeking new methods to treat diseases through cell therapy and regenerative medicine. In response to this trend, pioneering faculty at Taipei Medical University (TMU) created Taiwan's first research program specializing in cell therapy and regenerative medicine, establishing the country's first university-based Good Tissue Practice (GTP) laboratory as well.

The mission of the International Ph.D. Program in Cell Therapy and Regenerative Medicine (IPCTRM) is twofold: to provide students with the training necessary to become leading medical researchers and to promote translational medicine through cell-based therapy clinical trials. At the GTP lab, students learn first-hand how to produce cell-based medical products, gaining the knowledge and skills needed for careers in the rapidly growing field of cell therapy and regenerative medicine.

**Scholarships:** IPCTRM scholarships are available for outstanding applicants, offering up to NT 25,000/month (including TMU Type A) for 3 years.

### Important Dates:

- Application Period: Until February 15, 2025
- Online Interviews: March 15-23, 2025
- Results Announcement: April 2025
- Arrival at TMU: September 2025

# We Want You

• IPCTRM • Year 2025  
International Student Admissions @ TMU, Taiwan

**Apply NOW**

Join us in September, 2025

## 2025 Fall Admission

**Online interviews for shortlisted applicants**

March 15 to March 23, 2025

**Result of Applications**

April, 2025

**Registration and Semester Begins**

September, 2025

**Eligibility and Required Documents**

- Master degree in related fields
- M.D. degree and received at least two years of documented clinical training with publications.
- Two recommendation letters in English or Chinese submitted via the online admission system by two independent referrers
- English proficiency certified at CEFR B2
- Financial statement(at least \$4,000 USD)

**Notes**

**Departmental scholarships are available for outstanding applicants.**

**Registration**

**Scholarships**

**Application until  
February 15, 2025**
